PROFESSIONAL EXPERIENCE

Ms. Floyd has over 30 years of professional experience in the product stewardship field, including work with large international corporations in roles encompassing global materials procurement, product safety, and regulatory compliance management. Her expertise includes raw material review; supply chain management; safety and regulatory compliance of food, hygiene, and product packaging; international regulatory research; and regulatory agency relations.

Ms. Floyd has extensive, detailed knowledge of U.S. Food and Drug Administration (FDA) and global food contact regulations and regulatory affairs management through her experience supporting major global product brands and industrial suppliers.

Some examples of Ms. Floyd’s experience are as follows:

- Performed regulatory compliance services for major global consumer brands as a consultant with one of the world’s largest companies providing product and material testing, site/equipment inspection, and certification to ensure global/company standards.
- Coordinated submissions to North American regulatory agencies, global requests and formulation change requests to ensure the safety and regulatory compliance of products sold for use in food packaging, hygiene, and product packaging by an industrial pigments manufacturer.
- Managed the \$300 million annual global purchase and delivery of polyethylene and polypropylene resins, additives, surfactants, and capital project equipment for ten (10) international manufacturing plants located in the US, Europe, China, and Latin America.
- Researched and recommended products and suppliers; identified sourcing to reduce costs; negotiated and reviewed contracts; and obtained and analyzed vendor quote/bid documents.
- Provided leadership and development for global strategic sourcing teams, meeting or exceeding goals to achieve annual cost savings.
- Led the successful design, implementation, testing, and training of a new purchasing software system, resulting in lower labor costs and significantly improved services linking locations worldwide.
