### PROFESSIONAL EXPERIENCE

Mr. Jones is an OSHA-certified safety specialist with more than 20 years of experience in occupational health and safety and industrial hygiene in construction and industrial environments. He is responsible for project management, site planning, hazardous building materials inspection and sampling, abatement design specifications, oversight of hazardous material abatement, bid and construction services, permitting, document preparation, and public presentations for a wide variety of consulting assignments for commercial, industrial, healthcare, and residential clients.

He has specialized expertise in the following areas:

- Safety Compliance – inspection and evaluation of workplaces ensuring compliance with state and federal safety regulations.
- Safety Oversight and Management – on-site safety reviews and audits for OSHA regulatory compliance
- Incident/Accident Investigation and Risk Mitigation – identification of hazards, evaluation of incidents and accidents to determine root cause, and identification/implementation of corrective measures, and
- Safety Training and Development – customized training industrial hygiene, machinery guarding, respiratory protection, ergonomics, electrical standards, fall protection, hazardous materials, excavation/trenching/soil mechanics, confined space entry, incident and accident investigation, safety inspection techniques, and LOTO procedures.
