PROFESSIONAL EXPERIENCE

Ms. Tuttle is a solutions-oriented Industrial Hygienist experienced in providing health and safety-related site inspections, investigations, and reporting in residential, commercial, and industrial settings. She is knowledgeable in state and federal regulatory requirements, particularly as related to indoor air quality assessments, chemical monitoring, AHERA asbestos surveys, monitoring, abatement, mold inspections and assessments, personal exposure monitoring, lead testing, noise surveys, and other assessments.

Ms. Tuttle's professional background includes a number of years in direct client relations, and she is skilled at communicating clearly on complex matters such as regulatory requirements or data interpretation which adds value to the client-consultant relationship.

Ms. Tuttle's typical assignments have included:

- Providing consulting and inspections for schools under the U.S. Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA) asbestos-containing materials in schools rule;
- Performing indoor air quality assessments and post remediation assessments
- Conducting industrial hygiene assessments and monitoring for occupational exposure to various chemicals at commercial, light, and heavy industrial sites, manufacturing facilities, and hospitals
- Producing reports and other project documentation
- Performing noise surveys
