PROFESSIONAL EXPERIENCE

Aaron Martin is a Maine Licensed Geologist with 20 years of experience managing hydrogeologic investigations, Brownfields assessment and cleanup programs, landfill monitoring, environmental due diligence, and overseeing various types of subsurface investigations, geotechnical investigations, tank removals, fate and transport analysis and remedial activities throughout New England and the Mid-Atlantic states. Throughout his career, Aaron has maintained excellent professional relationships with clients including private sector, local municipalities, and various governmental agencies.

Mr. Martin's work has included a range of assignments:

- Managed numerous clean water hydrogeologic investigations including initial source identification, subsurface investigations and well installations, pumping tests, stream gauging, water quality assessments, and aquifer monitoring programs for the bottled water industry, municipalities, and private clients throughout New England.
- Managed Community-Wide Brownfields Assessment programs for the Town of Lincoln and City of Belfast, Maine. Licensed Geologist for over 100 Brownfields projects in Maine.
- Oversaw compilation of site inventories, completion of Phase I & II Environmental Site Assessments, remedial planning/implementation, regulatory interfacing, community outreach and education.
- Prepared remedial design plans and specifications, completed bidding phase services, assisted in contract preparation and contractor selection, reviewed submittal and managed construction phase services including pay requisitions, and performed construction observation for over 30 Brownfields Cleanup projects in Maine.
- Directed over 80 environmental remediation projects, including underground and aboveground storage tank removals, contaminated soil excavations and contaminated groundwater pump and treat systems for various clients throughout New England and the Mid-Atlantic states.
- Managed annual groundwater and surface water monitoring program for 5 closed, municipal landfills in Maine, including statistical analysis, updated monitoring plans and regulatory consultation.
- Prepared remedial design plans and specifications for new landfill vents concurrent with solar array installations at the City of South Portland's municipal landfill.
