PROFESSIONAL EXPERIENCE

Mr. Eisenhuth has 17 years of experience working with clients on environmental management and multimedia regulatory compliance in a variety of industries throughout the country.

Typical assignments in his various areas of expertise include:

- Regularly performing regulatory and environmental management audits for clients to assess compliance with applicable federal, state, and local regulations and conformance to environmental management system standards.
- Developing and presenting training sessions to help clients better understand and achieve compliance with applicable environmental regulatory programs. Typical training topics include Oil SPCC, stormwater, hazardous materials, and hazardous and universal waste programs.
- Preparing various permit applications, including applications for NPDES Permits, hazardous material storage permits, and air emission licenses.
- Preparing and submitting assorted environmental regulatory reports, including Tier II and TRI reports, hazardous waste reporting, air emission inventory reports, Title V air license annual and semi-annual reports, NESHAP compliance reports, and discharge monitoring reports.
- Developing user-friendly regulatory plans, including Stormwater Pollution Prevention Plans, Emergency Response Plans, Oil Spill Prevention, Control, and Countermeasures Plans, Integrated Contingency Plans, and Petroleum Transfer Manuals.
- Preparing environmental management tools to assist clients with meeting deadlines for reporting, providing training programs, collecting samples, completing inspections, required maintenance, and other meeting other conditions of applicable permits and requirements.
- Assisting clients with responses to inspections and notices of violation from federal and state regulatory agencies, including preparation of response letters, detailed response plans, and identifying appropriate regulatory requirements.
